Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 25 January 2006 has been entered.

Election/Restrictions

2. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 2, 5 and 6, directed to the species 2, 3 and 4 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

REASONS FOR ALLOWANCE

3. Claims 1-9 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "that generates in the object plane an image of the

modifiable optical transmission screen coinciding substantially with the spots of the object to be observed, the spots to be observed corresponding to a structure of the object" as set forth in the claimed combination. Claims 2-9 are also allowable based upon their dependence on claim 1.

The prior art of record teaches an optical microscope comprising a light source, an objective and a modifiable transmission screen comprising zones each presenting a first passing state and a second closed state, the modifiable optical transmission screen being placed on a optical path upstream from the object. However, the prior art of record does not teach that the modifiable optical transmission screen generates in the object plane an image of the modifiable optical transmission screen coinciding substantially with the spots of the object to be observed, the spots to be observed corresponding to a structure of the object because the pattern of spots obtained by the optical transmission screens of the prior art of record are determined by the desired resolution and do not coincide with the pattern of spots corresponding to the structure of the object and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571)
